The global fears about the spread of the Coronavirus, oil price drops caused by an oil price war between Russia and the OPEC countries, and the possibility of a recession led to the stock market crash in March 2020, and global stocks saw a severe downturn in this month. Yet the German stock index DAX continued to grow in March 2021, averaging 14,508 points compared to 13,951 points in February 2021, while the UK FTSE-100 also increased from 6,584 to 6,714 in the same period of time. The Euro STOXX amounted to 3,813 in March 2021, up from 3,667 in February 2021. Furthermore, the Dow Jones Industrial continued to increase, averaging 32,373 points in March 2021, compared to 31,293 points in February 2021.

The annual growth rate of M3 decreased to 12.3% in February 2021, from 12.5% in January 2021. The three-month average of the annual growth rate of M3 over the period from December 2020 to February 2021 reached 12.4%.

Monetary Conditions Index

Between April 2010 and July 2011, the monetary conditions index had remained stable. Its rapid upward trend since August 2011 had led to the first peak in July 2012, signaling greater monetary easing. In particular, this was the result of decreasing real short-term interest rates. In May 2017 the index had reached one of the highest levels in the investigated period since 2007 and its slow downward trend was observed thereafter. A steady upward trend that had prevailed since October 2018 was abruptly halted in March 2020 with the onset of the Covid-19 crisis, and the index continued to decline in 2020. Its rapid growth in January 2021 was again followed by a continuous decline in the index in February and March 2021.

## EU Survey Results

### EU27 Economic Sentiment Indicator
